Professional Summary

Detail-oriented Computer Science student skilled in Java and web development using HTML, CSS, JavaScript, React, and Node.js. Passionate about leveraging problem-solving skills, exploring emerging technologies, and building efficient, scalable, and user-focused software solutions.

Education

Galgotias University , B.Tech in Computer Science and Engineering	(CGPA:8/10)	August 2022 – May 2026
• Coursework: DSA, SDLC, Databases Management System, Object-Oriented Programming System.		
MDS Inter College , XIIth	(Percentage: 75%)	April 2021 – June 2022
ARN Kela Inter College , Xth	(Percentage: 81%)	April 2019 – May 2020

Skills

- **Languages** : Java(proficient), JavaScript, SQL, C# (Basics),Python (basic) .
- **Frontend Technologies and Frameworks** : React.js, Next.js, JavaScript, CSS3, Tailwind CSS, Bootstrap, HTML5.
- **Backend DataBases** :Node.js, Express.js, REST API, WebSockets, MySQL, MongoDB.
- **Tools DevOps** :Git, GitHub, Netlify, Railway, VS Code, Vercel, Render.

Projects

Blog(Blogify)	Repository Link	Live Link
• Implemented secure user authentication for over 2 user roles (Admin User) using JWT and Express middleware, reducing unauthorized access by 100 • Integrated Multer for image upload, supporting media-rich blogs and improving user engagement by 35%. • Used MongoDB for dynamic data storage, handling over 500+ blog entries during testing without performance degradation. • Secured user credentials by implementing bcrypt-based password hashing with salting, protecting against plaintext leaks and enhancing authentication security by 90%.		
ImageCompressor	Repository Link	Live Link
• Developed a client-side image compression web app using React.js and the HTML5 Canvas API, enabling users to upload and compress images directly in the browser. • Implemented real-time image resizing and quality reduction with an intuitive UI for original vs. compressed image comparison • Deployed the project on Netlify for global accessibility and optimized performance. • Enhanced overall app efficiency by achieving up to 80%.		
Medical Imaging Diagnosis Portal	Repository Link	Live Link
• Developed a full-stack Medical Imaging Diagnosis Portal enabling users to upload reports (PDF/images) and receive AI-based analysis in real time. • Implemented CNN-based and rule-based AI processing to detect abnormal medical values and generate preliminary diagnosis with severity levels. • Built a responsive frontend using React.js and Tailwind CSS and integrated backend using Node.js, Express, and MongoDB. • Integrated OCR and report parsing to extract data from medical images and provided actionable insights like precautions, diet, and recommended tests.		

Acheivement and Certificates

Certificates:

Java Full Stack - (Wipro)
java Course completion - Programming Hub
