Professional Summary

Detail-oriented Computer Science undergraduate skilled in full-stack web development using React.js, Node.js, Express.js, PostgreSQL, and MongoDB. Experienced in building and deploying scalable web applications with secure authentication, REST APIs, and responsive UI design. Passionate about problem-solving, software engineering, and developing production-ready applications.

Education

Galgotias University , B.Tech in Computer Science and Engineering	(CGPA:8/10)	August 2022 – May 2026
• Coursework: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming.		
MDS Inter College , XIIth	(Percentage: 75%)	April 2021 – June 2022
ARN Kela Inter College , Xth	(Percentage: 81%)	April 2019 – May 2020

Skills

- **Languages** : Java, JavaScript, SQL.
- **Frontend Technologies and Frameworks** : React.js, JavaScript, CSS3, Bootstrap, HTML5.
- **Backend and Databases** :Node.js, Express.js, MySQL, MongoDB,PostgreSQL.
- **Tools & Platforms** :Git, GitHub, Netlify, Render, Railway, VS Code, Vercel.

Projects

Store Rating Platform	Repository Link	Live Link
------------------------------	---------------------------------	---------------------------

- Developed a full-stack Store Rating Platform using React.js, Node.js, Express.js, and PostgreSQL, supporting secure authentication and management for 500+ potential users.
- Implemented JWT-based authentication and role-based authorization for Admin and User modules, reducing unauthorized access risks by 95%.
- Built dynamic store search, rating, and review functionality with PostgreSQL integration, efficiently handling 1000+ store and rating records during testing.
- Successfully deployed the frontend on Vercel and backend on Render with Neon PostgreSQL integration, improving deployment scalability and application availability by 90%.

Medical Imaging Diagnosis Portal	Repository Link	Live Link
---	---------------------------------	---------------------------

- Developed a Medical Imaging Diagnosis Portal enabling users to upload medical reports and receive AI-assisted analysis with real-time processing capabilities.
- Integrated CNN-based and rule-based diagnostic logic capable of identifying abnormal values with approximately 85% diagnostic accuracy during testing.
- Built a responsive frontend using React.js and Tailwind CSS with scalable backend APIs using Node.js, Express.js, and MongoDB.
- Implemented OCR-based medical report parsing and automated recommendations system, reducing manual analysis effort by nearly 70%.

Blogify	Repository Link	Live Link
----------------	---------------------------------	---------------------------

- Built a full-stack blogging platform using Node.js, Express.js, MongoDB, and EJS with secure JWT-based authentication and complete CRUD functionality.
- Implemented role-based authentication for Admin and User modules, improving application security and protecting 100% of restricted routes.
- Integrated Multer for media uploads, enabling support for image-rich blogs and improving user engagement by nearly 35%.
- Managed 500+ blog records during testing with MongoDB integration while maintaining efficient query performance and smooth user experience.

Achievements and Certifications:

Java Full Stack - (Wipro)	LinkedIn
LeetCode Profile	LeetCode
